

100% of all donations received go  
directly to wild tiger conservation

You can donate to  
21<sup>st</sup> Century Tiger in a  
variety of ways:  
By supporting our 2010  
Justgiving campaign,  
through Payroll giving or  
1% for the planet, donate  
directly, PayPal, cheque or  
credit card. Details how  
to donate can be found on  
our website on our 'How  
can I help?' page.

## Projects 2010-11. 21<sup>st</sup> Century Tiger supports many projects throughout Asia including:

### The Phoenix Fund, Russia.

21<sup>st</sup> Century Tiger currently supports four Phoenix Projects in The Russian Far East; These range from Anti-poaching in the Lazovsky Reserve and Northern Primorye to general support for Udedge Legend National Park and for the Core Phoenix Fund 2010. Yuri Trush, the linchpin and squad leader featured in both Sasha Snow's 'Conflict Tiger' and John Vaillant's 'The Tiger' carries on his vital and important work with Phoenix not only in anti-poaching but also as an educator throughout the region.

The Amur Tiger Conservation Project, funded since 2001 by 21<sup>st</sup> Century Tiger, aims to ensure the long-term survival of Amur tigers in the wild. The project focuses on anti-poaching in the important region of Primorye and also includes conservation-oriented ecological education and outreach activities for children and adults. The main long-term objectives of these efforts are to raise awareness, reduce poaching and habitat destruction as well as human-induced fires in the Amur tiger range.

### Fauna and Flora International (FFI), Sumatra.

Anti-poaching teams in Sumatra's Kerinci Seblat National Park have been tackling the trade in tiger parts by helping protect the park since 2001-2009 records show that, in areas where FFI's patrols have been able to focus tiger

populations have stabilized or even increased to approximately one tiger record per 23kms. FFI 'blog' regularly from the field on [www.21stCenturyTiger.org](http://www.21stCenturyTiger.org).

### The Zoological Society of London (ZSL), Sumatra.

ZSL's work in Sumatra focuses on tigers and takes in issues ranging from carbon trading and oil palm plantations to protection of Berbak National Park. Between 1990 and 2000, 25% of the forest in Berbak was lost due to illegal logging, clearance and fire, and in 2009 this caused a spate of conflict incidents with the tiger responsible almost certainly killed by illegal loggers. These threats are now escalating at a worrying pace, and ZSL is using 21<sup>st</sup> Century Tiger funding to establish a network of local community rangers, working closely with the FFI anti poaching teams, to investigate and deter wildlife crime and encourage good relations between local people and the police.

### IFAW, China 'Saving the Majestic Tiger'.

In 2010 21<sup>st</sup> Century Tiger approved funding for a IFAW project set in China. For the past twelve years IFAW has been running consumer awareness campaigns on the link between consuming tiger parts and the decrease of wild tigers - urging Chinese consumers to reject tiger parts. IFAW are now ramping up efforts to educate China's youth and will be reaching out to schools with a specific educational campaign on tiger conservation.

### Freeland Foundation, Thailand.

The primary aim of this FREELAND Foundation project is to initiate the provision of professional development for park rangers in order to build their capacity to protect wildlife populations, especially tigers. 'Pang Sida' has been largely overlooked as a serious site for tiger conservation in Thailand receiving very little support. Preliminary information coming out the neighbouring park is that tigers do still exist, are breeding and could prove to be a viable source population critical to Thailand's efforts to conserve tigers.
